Work Experience/Projects

2024 Data Science Intern at PwC

- Developed a **Speech-to-Text** pipeline using OpenAI's Whisper model for a major Indian private power company, processing customer service call recordings.
- Preprocessed transcripts with **NLP** techniques and performed **Sentiment Analysis** through **VADER** and **transformers**.
- Created a **keyword extraction model** to identify issues discussed in transcripts.
- Built a pipeline using **SMOTE** and **RandomUnderSampler**, optimizing an **XGBoost** model on highly imbalanced data (**imbalance ratio of 0.00002**) to achieve accuracy of **87%**.
- Developed a real-time API-based model with over **90% accuracy** to predict vehicular movement on roads.

2024 Research Intern, UNSW

- Cleaned and processed a large corpus of texts for **semantic** and **sentiment analysis** of translations in Sanskrit, Telugu, and Hindi.
- Applied BERT for sentiment analysis, performed **multilabel sentiment classification**, and used **Jaccard score** for evaluating sentence similarity.
- Compared translations generated by Google Translate, Gemini, and ChatGPT with human translations.

2024 Room Sync

ML Project

- Developed an ML-integrated room service application.
- Generated image datasets via **web scraping**.
- Built **5 convolutional neural network** models for tasks like **messiness detection** and **stain/damage identification**.
- Utilized **YOLOv5** for object detection and item counts in rooms.

2023 Uber Trip Dashboard

Analytics Project

- Built a dashboard using **100k** Uber trip records, displaying **5+ key metrics** like trip duration, locations, and amount.
- **Cleaned** and **merged** Uber's Trips dataset using **Python**.
- Applied **SQL** for **data querying** and **table merging**.
- Employed **DAX** for **data modeling** and **calculations**.
- Utilized **Power BI** to create a dynamic dashboard.
